

Small Pinch Grip

Description

Pinch grips are lightweight miniature vice grips, which use a hinge action to initially grab a sample, with a wing nut to tighten the jaw faces.

Each 10 mm x 10 mm (0.39" x 0.39") jaw face has a slight groove to hold the sample securely, yet avoid inducing a break within the grip. Pinch grips are particularly well suited for peel testing of thin plastic films.

Supplied with 10-32 UNF adapter and grub screw as shown.

Applications

Used for peel and tensile testing of:

- thin film
- tissue
- woven yarn
